

UNIQUE AND SUSTAINABLE INVESTMENT OPPORTUNITIES

with high returns in an undiscovered country

„What we do today decides what the world of tomorrow will look like.“
(Marie von Ebner-Eschenbach)

The IN-US community creates living spaces and visionary projects in future markets, such as the one currently underway in The Gambia, West Africa. As a forward-thinking community of pioneering entrepreneurs, we see an investment in the smallest country on the African continent not only as an investment opportunity with promising returns, rather we would like to contribute to an optimistic, sustainable and trusting world of tomorrow with our partner projects. Be part of this team too and shape your own free future.

DEVELOPMENT AND POTENTIAL

We offer our investors innovative investment opportunities in The Gambia. Financial, social and environmental sustainability is a top priority in our projects. Only in this way do we enable our customers to live financial freedom through their investment, to discover and develop their entrepreneurial potential and ultimately to help shape an aspiring, happy society. The cornerstones that distinguish IN·US are:

Community

The Gambia has a lot of potentials which can be discovered and developed.

With our partners and projects, the IN-US community has an extensive field of activity.

Freedom-loving entrepreneurs and investors are very welcome in our ranks.

Investment

The core competence in our investment opportunities is a wide range of different real estate projects.

We are also currently developing farming, timber cultivation, tourism and solar energy projects.

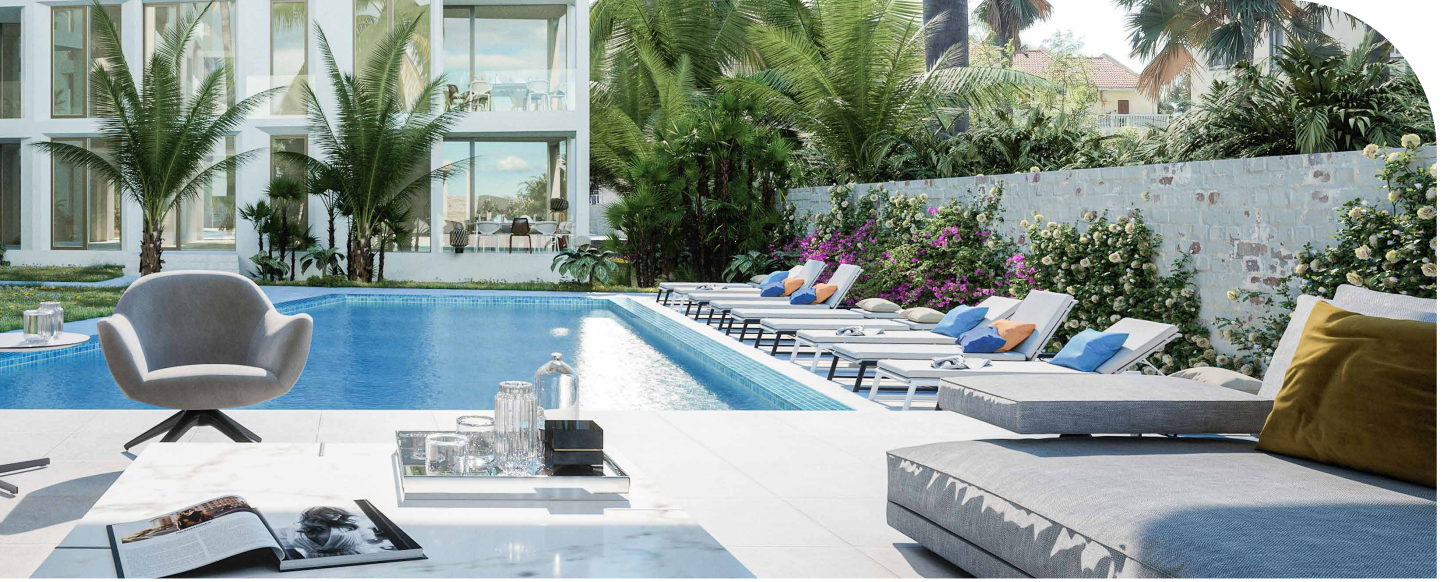

Sustainability and green investment are firmly anchored in our core values.

Sustainability

Living in freedom and with independence has gained enormously in value in recent years and has become very significant for people.

In the future, we see Gambia as a symbol of sustainable building, peace, independent entrepreneurship and freedom on the African continent.

THE TEAM OF SUCCESS

We take responsibility for leaving behind a free world to our children. It is time not only to let one's money work, but to focus more on creating real value as an entrepreneur in order to generate sustainable economic and social added value. With our projects, we have created an entrepreneurial network that meets the ecological, social and financial demands of our time.

THE IN-US COMMUNITY HAS THE POSSIBILITY TO PAY WITH BITCOIN

The benefits of Bitcoin's decentralized blockchain are an ideal fit with IN-US core values. Therefore, we are integrating this new system into our community and enable payment with Bitcoin in our innovative investment projects. The IN-US partner companies are also paid in Bitcoin on request.

FUTURE PERSPECTIVE FOR THE GAMBIA

Africa's smallest and democratic republic in the safe west of the continent makes living the dream of a life of independence, freedom and ease possible. A mix of people from different nations live together peacefully and mindfully – surrounded by dreamlike nature and a very diverse fauna.

The potential for significant positive development in this somewhat sleepy and dreamy country is huge. The hurdles due to state requirements and specifications are very low compared to Western countries. Living in freedom and independence has gained enormously in value in recent years and has become very significant for people. Where Monaco used to symbolize glamorous luxury life, in the future The Gambia can perhaps stand as a symbol for luxury with the new values of freedom, peace and independence on the African continent.

THE FIRST STEP TOWARDS FREEDOM

For freedom-loving prospective investors, there are several ways to get in touch with IN·US. On our investor trip we offer our prospects a feel for what sustainable investments in The Gambia look like and what is so special about this still undiscovered country. Magically, our travel adventurers network with each other and together with the local people. They dive deep into the unique culture of The Gambia.

We are happy to provide more detailed information about our projects in an individual consultation.
